Elisha Kipkemai Ngetich

College of Health Sciences, University of Nairobi, Kenya

"I am ecstatic at winning the Merck Diabetes Award 2016. I thank Merck for providing this wonderful platform."

Ralph Obure

College of Health Sciences, University of Nairobi, Kenya

"The Kenyan healthcare system faces new challenges in diabetes and other non-communicable diseases."

Antara Bagchi

Indira Gandhi Government Medical College, Nagpur, India

"Merck is providing an opportunity for the care and control of diabetes in the community especially in Africa."

Samuel Mucheru

Aga Khan University, Kenya

"This award is important to me because it marks the start of a future career in diabetes management worldwide."

Tinka George

Makerere University College of Health Sciences, Uganda

"I am grateful and happy that Merck has provided us with this great opportunity to advance our knowledge in diabetes management."

Gloria Ani-asamoah

Accra, Ghana

"It is a privilege to acquire current knowledge in the management of diabetes. It is my hope that at the end of the award, we will have a better understanding of the disease and its management."

Nujood Al Shirawi

Intern, Dubai Health Authority, United Arab Emirates

"Diabetes is a lifelong illness which affects the lives of more than 14% adults in UAE. With such a high prevalence, it is important to have a better understanding of the disease and its management."

Najmah Kuddah

General Practitioner, University of Indonesia, Indonesia

"Indonesia is the fifth largest population with diabetes, yet 73.7% is undiagnosed because of lack of awareness and access to healthcare services."

Dominic Oduro-Donkor

Cape Coast Teaching Hospital, Ghana

"In Ghana many people do not have access to healthcare services in order to identify, diagnose and treat diabetes. The reason why this award is important to me is because Merck has given me an opportunity to take part in a global initiative to improve access to diabetic care in Africa will slowly grow with the initiation of this award, because it will create 'ownership' of the disease and its management."

Ken Munene Nkonge

University of Nairobi, Kenya

"Similar to other countries in Africa, majority of people living with diabetes in Kenya are diagnosed late, leading to complications and poor outcomes."
